EKLUND'S

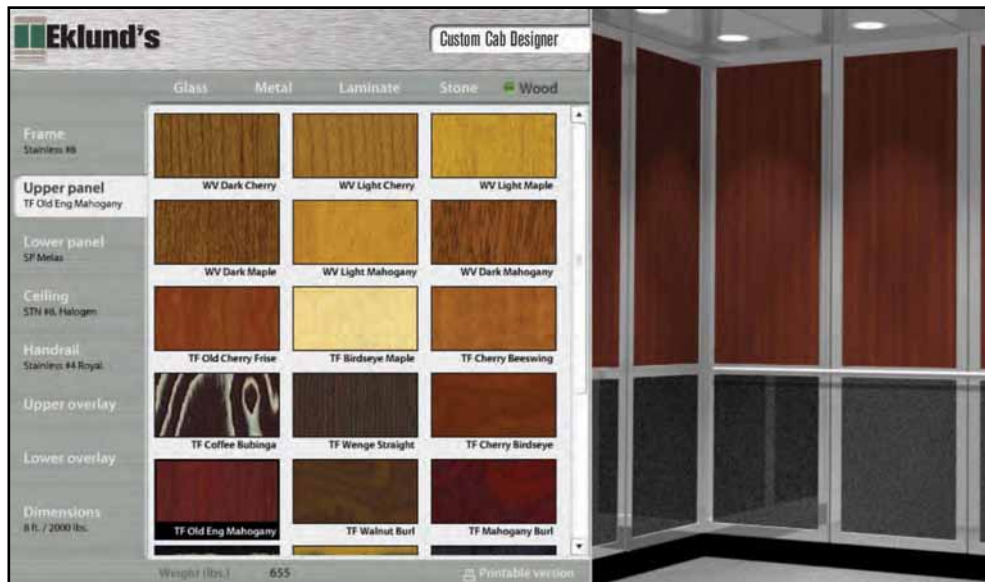

elevating your vision

Eklund's is an industry leader in the vertical transportation industry. As a provider of total elevator cab solutions, Eklund's has evolved into the 21st century through innovative design, highest quality fabrication and superior field installation. Distinctive designs and a wide variety of durable modern materials combined with solid values like customer service, code compliance and pretesting of components, make Eklund's the first choice of architects, property managers, industry consultants and elevator contractors.

We continue the architectural concept of the building into the elevator to provide a smooth transition for building tenants and visitors. Whether the building concept requires a custom elevator cab, a standard elevator cab, or a renovation of an existing cab, we have the solution for you.

**Visit our website today and try our
Custom Cab Designer.**

The Custom Cab Designer is a unique and innovative on-line tool to assist you in the design of your elevator cabs. Created to provide a custom appearance to standard, pre-engineered cabs, the Custom Cab Designer can be used to specify either new cabs or renovation projects.

In a matter of minutes, you can design an elevator cab interior specifying frames, upper and lower walls, ceilings, handrails, lighting, size and weight to create just the right elevator cab for your project. The use of the Custom Cab Designer can significantly shorten the design cycle, reduce production time and save you money.
